REGISTRATION FOR U.S. IMPORTERS.

How to remark Australian imported meat products using Meat Messaging.

FSIS Directive 9900.5 for Label Verification of Imported Meat, Poultry, and Egg Products.

When an Australian product has been refused entry because of partially, or completely, illegible or missing shipping marks, the FSIS Directive 9900.5, Section VII, E allows procedures for correcting shipping marks when using barcodes. When FSIS Inspection Program Personnel (IPP) can verify the unique identifier within a barcode on the shipping unit, using supporting documentation provided by the foreign country, FSIS permits official import inspection establishment personnel to apply the shipping mark to shipping units without having an official representative of the foreign inspection system on site to approve and observe this activity.

How Meat Messaging can improve the re-certifying process.

Meat Messaging acts as an alternate protocol for managing illegible or missing shipping marks for the U.S., compliant to FSIS Directive 9900.5. The USDA FSIS official import inspection establishment can log in to the Meat Messaging website, or the Meat Messaging app on their phone or tablet, and search using the case barcode number or the Health Certificate number. The USDA FSIS official import inspection establishment can then download the consignment report information, print off the 'All Carton Serial Number Report' showing the Health Certificate number, and individual shipping unit's barcode numbers, and present it to the FSIS representative. The consignment can then be **approved within minutes.**

Instructions for a Meat Messaging consignment search.

Step 1: Log in to the Meat Messaging website at https://meatmessaging.org/ with your username and password. Or download the Meat Messaging app and log in to the app.

If you have forgotten your username or password, please email info@meatmessaging.com
If you do not have a username or password, please complete the registration form above and send it to info@meatmessaging.com

Step 2: On the website main menu click the **Search** button.

Step 3: Enter a Health Certificate number or barcode into the search field related to a carton that has a damaged or missing shipping mark. Then click the **Search** button.

Step 4: Click the blue '**Barcode List**' button to display the PDF of the consignment details and the full list of the carton barcodes.

To access the search instructions, go to:
